<b>INTERNATIONAL TRAVEL PLAN</b> <input checked="" type="checkbox"/> PROJECTION <input type="checkbox"/> EXCEPTION <input type="checkbox"/> AMENDMENT <input type="checkbox"/> CANCELLATION			
<b>MONTH</b> March	<b>FY</b> 2014	<b>DATE</b>	<b>TRIP ID#</b> ORD-003899
<b>NAME OF TRAVELER (and office location)</b> Peter Egeghy ORD,NERL,HEASD/HEASD	<b>TRAVELER'S PHONE</b> 919-541-4103		<b>SECURITY CLEARANCE</b> None
<b>SOURCE(S) OF FUNDS</b> Non-EPA Source - Int'l Agency for Research on Cancer (IARC) (WHO)	<b>COST EST.</b> \$1500.00	<b>SOURCE OF FUNDS (Other)</b> ORD	<b>COST ESTIMATE</b> \$1,872.03
<b>DATES OF TRAVEL</b> From: 03/01/2015 To: 03/11/2015			
<b>DESTINATION(s) (Country - City)</b> FRANCE - LYON			
<b>PURPOSE OF TRAVEL, JUSTIFICATION, AND SPONSORING ORGANIZATION</b>			
<p><b>Meeting dates</b> 03/03/2015 to 03/10/2015</p> <p><b>Sponsor</b> International Agency for Research on Cancer (IARC) (part of WHO)</p> <p><b>Justification</b></p> <p><b>Travelers Qualifications</b>            Dr. Peter Egeghy is recognized both inside and outside the Agency as an expert in the area of human exposure assessment research. He currently plays a significant role in leading the Agency in the research area of rapid exposure-based chemical screening and prioritization for risk assessment. He is responsible for leading the planning, implementation, and analysis of high quality human exposure research conducted at EPA.</p> <p>Dr. Egeghy is sought by other researchers and program offices in EPA to provide guidance and comments and has served on a number of committees, workgroups, and science councils. He is well respected as an author having authored or co-authored approximately 36 peer reviewed publications and dozens of oral presentations.</p> <p><b>Traveler's Purpose/What traveler will do</b>            Dr. Egeghy has been invited to participate in the IARC Monographs Working Group as a peer reviewer, and will be revising drafts, and discussing and finalizing evaluations. The combined results of this working group will be published in "The Lancet Oncology" at a later date.</p> <p>The traveler will be: 1) Reviewing, discussing, and finalizing evaluations related to insecticide and herbicide exposure research; 2) representing HEASD and ORD research concerning human exposure; 3) providing insights on exposure issues to the international community based on EPA research over the past decade.</p> <p><b>Benefit to EPA</b>            What is the substantive benefit of the travel?            Understanding and developing the science to inform pesticide regulation is a major goal of the Office of Research and Development. The workshop is assembling international experts in the area pesticide exposure and toxicology to examine existing and emerging issues related to organophosphate insecticides and herbicides; specifically Diazinon, Glyphosate, Malation, Parathion, and Tetrachlorvinphos. It is important for EPA to understand and address these issues as they are being addressed globally. It is also a benefit to EPA to communicate our understanding and scientific knowledge related to pesticide exposure and chemical safety through well-respected documents such as IARC monographs.</p> <p>Participation in this workgroup will demonstrate ORD's international leadership in pesticide exposure assessment.</p> <p>What is the nature of the activity that will be performed by the EPA employee?            The traveler's role will be extensive and will include the following. 1) Reviewing, discussing, and finalizing evaluations related to insecticide and herbicide exposure research; 2) representing HEASD and ORD research concerning human exposure; 3) providing insights on exposure issues to the international community based on EPA research over the past decade.</p> <p>How is the travel being funded?</p>			

IARC is funding the majority of this travel, either directly or in cash to the traveler; EPA appropriations will fund any remaining expenses.

Matt Martin, ORD/NCCT, will also attend.

No annual leave requested.
